

## Supply notice: TcpO2 consumables and E5250 TcpO2 electrode

### TcpO2 consumables

Radiometer previously announced that it is no longer manufacturing fixation rings or contact liquid for TcpO2 and is referring its customers to Perimed.

You can order fixation rings and other TcpO2 consumables directly from our website:

- For the US and Canada: <https://www.perimed-instruments.com/us/order/>
- For all other regions: <https://www.perimed-instruments.com/order/>

### E5250 TcpO2 electrode

Perimed is currently taking over production of E5250 TcpO2 electrodes from the current manufacturer, Radiometer.

Important: You do not need to switch suppliers at this time. Continue to procure electrodes from your current provider, whether that is Radiometer or Perimed.

We will keep you informed and let you know as soon as Perimed-produced electrodes become available.

For more background, read our CEO's blog post: [Perimed ensures long-term continuity for TcpO2](#).

For questions, please contact your local Perimed representative directly or reach out via our website:

- [US and Canada](#)
- [All other regions](#)

Kind regards,

**Jimmy Bakker**
